

MAJOR FISHING JETTIES OF SOUTH AUSTRALIA

Port Rickaby - Spencer Gulf

Jetties - The word 'jetty' is an interesting one. Like much of the English language, it comes from an old French word 'jeter' meaning 'to project'. Other words in the same family are 'jet aircraft and jettison'. Well, South Australia still has close to 60 great fishing jetties which project out into our beautiful coastal waters and most were originally constructed to harness the primary production trade of grain, farm animal and mineral exports. They are generally built from timber that was harvested in the South West of Western Australia ie jarrah and karri – some jetties are amongst the longest in the southern hemisphere!

West Coast

- Fowlers Bay - S 31 59 12 x E 132 26 14
(Sampson fish, strongfish, trevalley, tommy ruffas, flathead, rockies, snapper, salmon, sweep, squid)
